

Energy Star saves you money!

Energy Star appliances not only gain you rebates, they also will save you money in operating costs during the life of the appliance. Check out www.energystar.gov to learn more.

Energy Efficiency Incentives

"How do I collect my incentive?"

Members are always welcome to call in advance of their purchase to verify appliance eligibility. Once the appliance is purchased, the member should send a copy of the receipt, including the unit model number, to SVE. Purchase receipts also are required for irrigation incentives.

Incentives for installing home and irrigation energy-efficiency measures.

Surprise Valley Electrification Corp.

Surprise Valley Electrification Corp. offers member incentives for installing energy-efficiency measures in their homes and irrigation systems.

Residential incentives include free compact fluorescent lights and water heater wraps.

In the field, irrigation hardware improvements, such as installation or replacement of pressure regulators, nozzles, sprinklers and gaskets, qualify for incentives. Incentives also are available for National Electrical Manufacturers Association (NEMA) premium motors ranging from 5 to 500 horsepower.

SVE continues to provide pump tests at no cost to its members.

Please contact Lynn Culp, SVE member service manager, with any questions about residential efficiency incentives, if you have an irrigation project you believe is eligible for an incentive or to schedule a pump test of your system. Please note that incentives may change without notice.

Residential Efficiency Incentives

Energy Star clothes washers	\$30-70
with Non-Electric water heater	\$20
Energy Star refrigerator/freezer	\$15
Electric water heaters	\$25-75
Contact office for water heater details.	
Water Heater Wrap	free to member*
Compact Fluorescent lights	free to member*
Electronic thermostat replacement	\$160/home
Energy Star manufactured home	\$1,150

** These are available at the SVE office. One wrap and one six-pack of CFLs per member household.*

Irrigation Incentives

Variable Frequency drive motor	\$80/hp
NEMA premium efficiency motor	\$15/hp
Center pivot boot gasket	\$175/pivot
Low pressure regulator—pivot	\$5/regulator
Rotating type sprinklers—pivot	\$4/sprinkler
Multi-trajectory spray —replace impact	\$4/nozzle
Drop tube—pivot	\$3/drop
Goose neck elbow—pivot	\$1.65/elbow
Rebuilt/new brass sprinkler	\$3.75/sprinkler
Flow control nozzle	\$4/nozzle
Impact sprinkler replacement	\$4/sprinkler
Portable main/wheel/hand line gasket replacement	\$2.75/gasket

New drains- pivot/main/wheel/hand line	\$1/drain
Rebuilt or new w/l leveler	\$.75/leveler
Cut and pipe press repair	\$10/pipe section
Irrigation pump and system efficiency test	free to member

Free Irrigation Pump Testing

An ultrasonic flow meter is used to measure flow in gallons per minute. The discharge pressure is recorded and the pumping water level is measured using a sounder or water level indicator. Electrical input is recorded or measured off the electric meter to calculate kilowatt demand and converted to electrical horsepower.

This data is used to determine the operating efficiency of the pumping plant, and can be used to determine if the pumping plant is in need of repair or replacement.
