

Surprise Valley Electrification Corp. offers a variety of products for the protection of your valuable electronics and electrical equipment. All devices can be purchased at our Alturas office and can be delivered or mailed to outlying areas.

#### Did you know?

Power surges can enter your home on electric, cable and telephone lines. Also, power surges can originate from electrical devices within the home or office.

That's why a meter socket surge protector can't do everything, and why you should protect phone lines and electric lines coming into your computer.

Also, no protection available will protect electronics from a direct, catastrophic lightning strike.

# Electrical Protection Devices

## Meter Socket Surge Protector

Provides your first line of defense for single-phase installations, including residences, from surges entering on the power line.

- Diverts the surge to the ground at the meter.
- For best protection, use plug strip surge protectors in conjunction with the meter socket surge protector.
- \$140 plus tax.
- Installed by SVE at no charge to member.

## Pest-A-Cator roach and rodent repeller

Electromagnetic technology works through a building's wiring to drive pests from within the walls, ceilings and floors.

- Does not use any chemicals or poisons.
- \$23 plus tax.

## Plug Strip Surge Protector

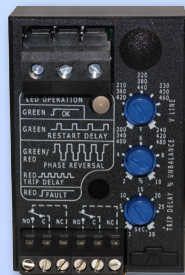

Protects connected electronic devices from surges entering and originating within the home or office, as well as surges entering on the phone line.

- For best protection, use in conjunction with a meter socket surge protector.
- The strip provides eight protected outlets and two protected phone jacks.
- \$42 plus tax.

## Three-Phase Voltage Monitor/ Motor Protector

Protects against single-phase condition or phase loss and is recommended for protection of irrigation pump motors.

- Will not allow motor to start if a single-phase condition exists.
- Protects against phase reversal, undervoltage and unbalanced voltage.
- \$108 plus tax.
- Installed by your licensed electrician according to manufacturers' specifications.

## Uninterruptible Power Supply (UPS) Devices

Surprise Valley Electric offers two models of Tripp Lite UPS units. UPS systems keep your equipment operating smoothly during power bumps and brown out conditions, and allow for safe shutdown of your equipment without data loss.

### BCPRO600

- Surge suppression and long-lasting battery support for personal computers and other sensitive devices.
- Designed for the home or small office.
- \$163 plus tax.

### The HT850

- Home theater UPS system offers complete protection for computers, workstations and home theater devices.
- Supports VCR/DVR components up to three hours during a power failure.
- \$200 plus tax.

Prices are subject to change.
